Diagram

a template brought to you by your friends at MURAL

Data flow diagrams visualize relationships between external entities, processes, data stores, and data flows. You can visualize data flows with both parallel and asynchronous behaviors using our data flow diagram template.

PEOPLE

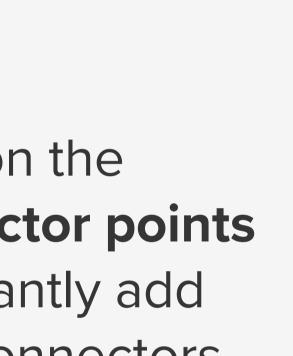

TOOL TIPS

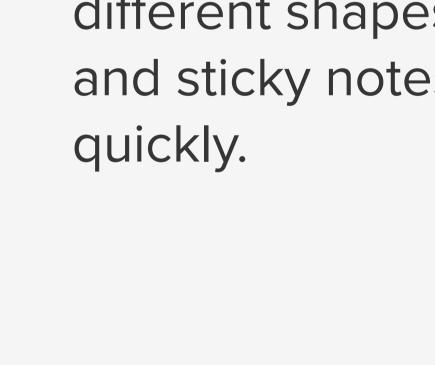

Create connections at the speed of thought:

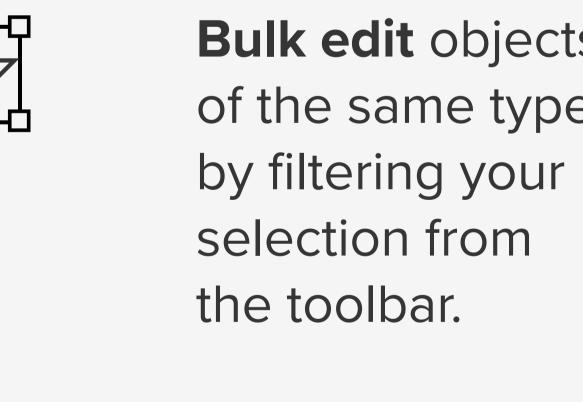

to create new diagrams faster.

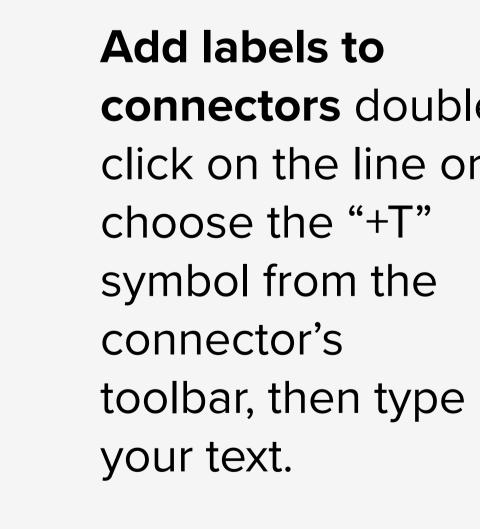

to instantly add new connectors and shapes.

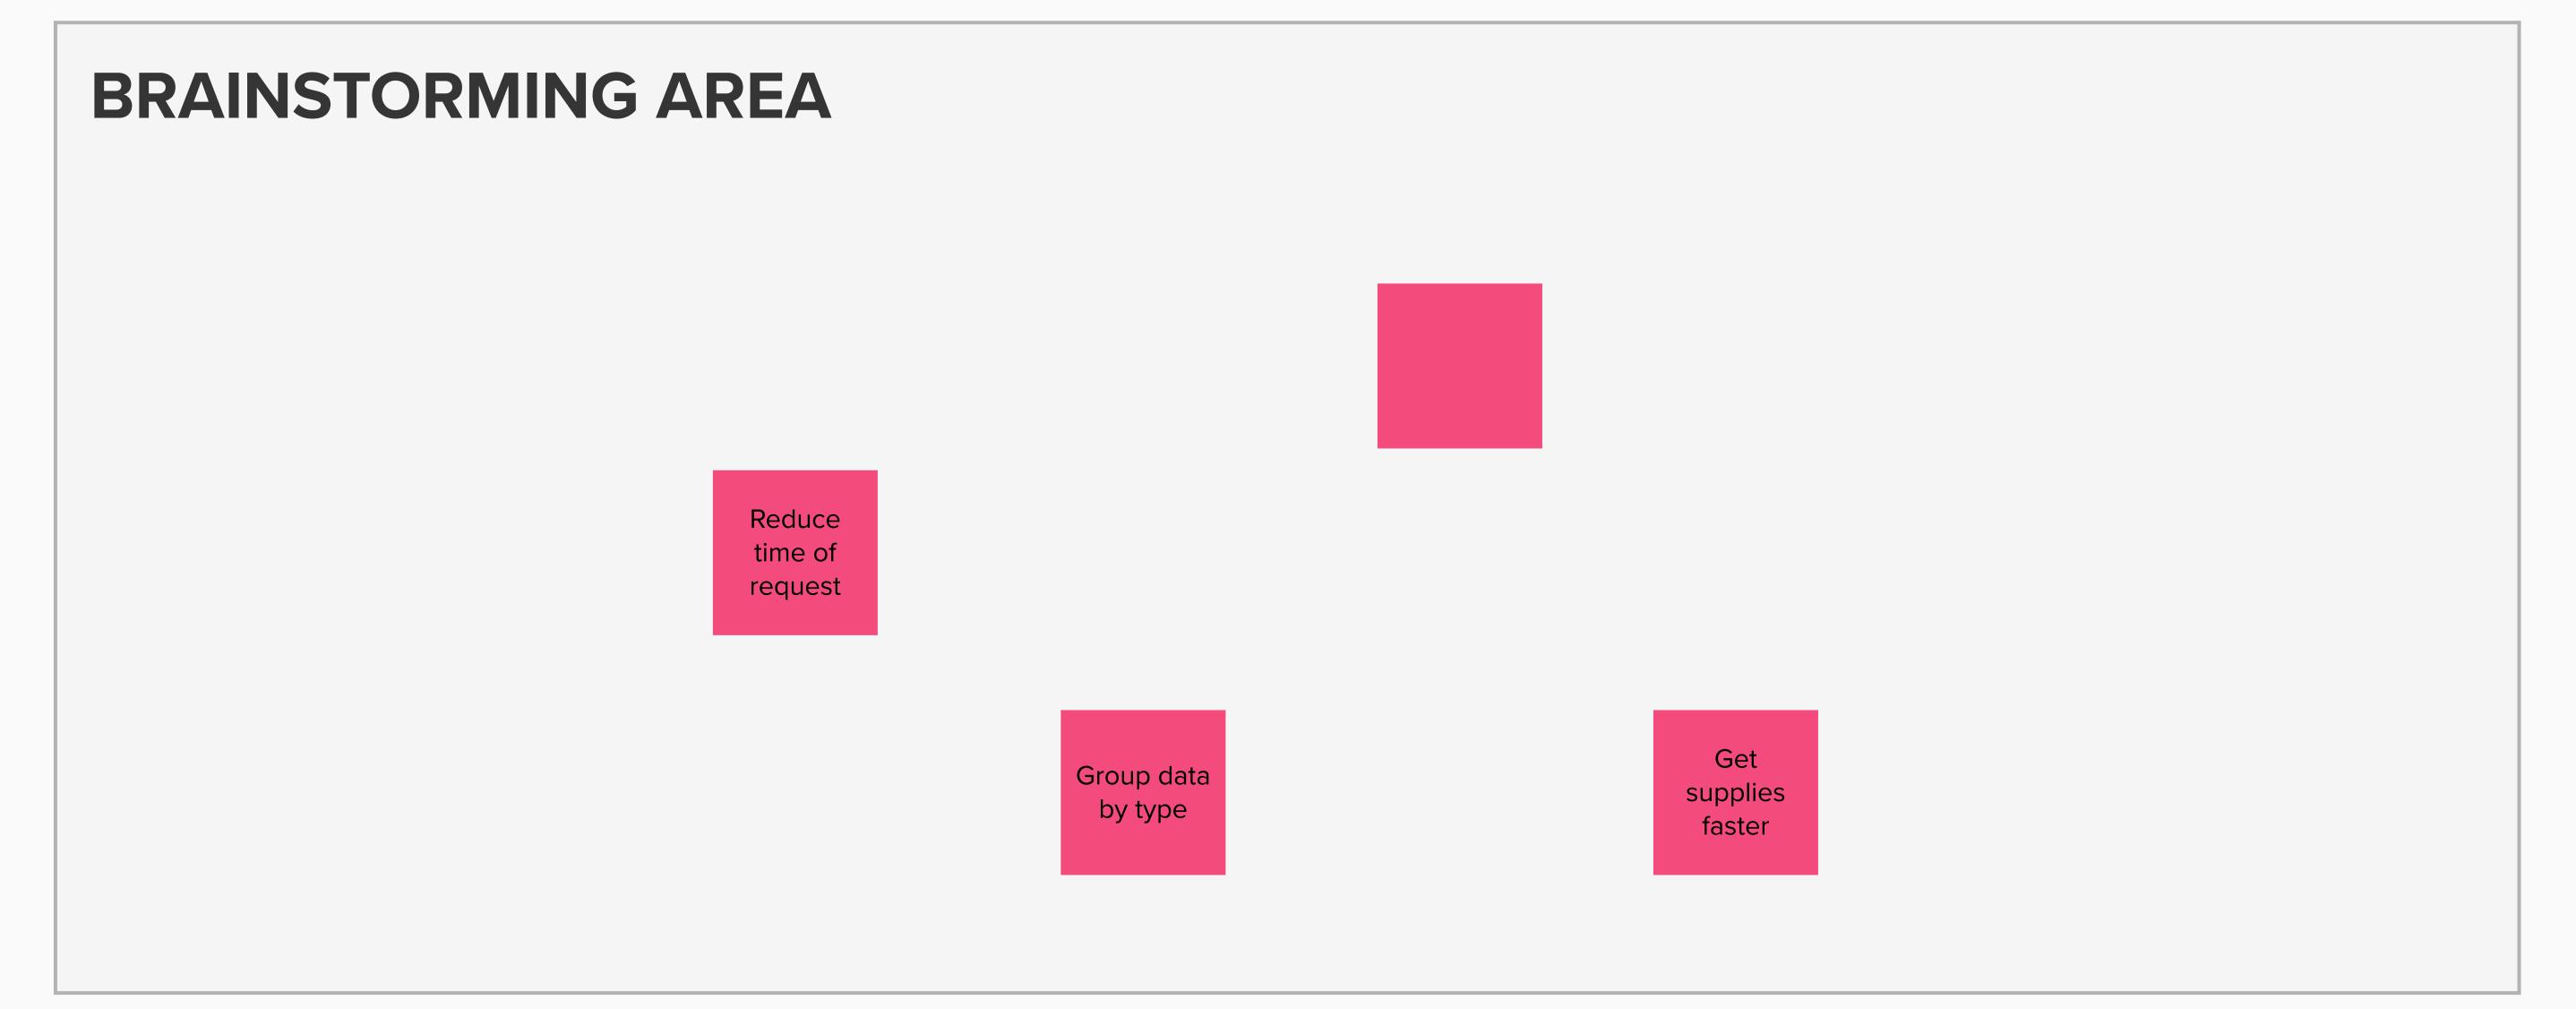

Define the process you want to visualize, or use a pre-existing one

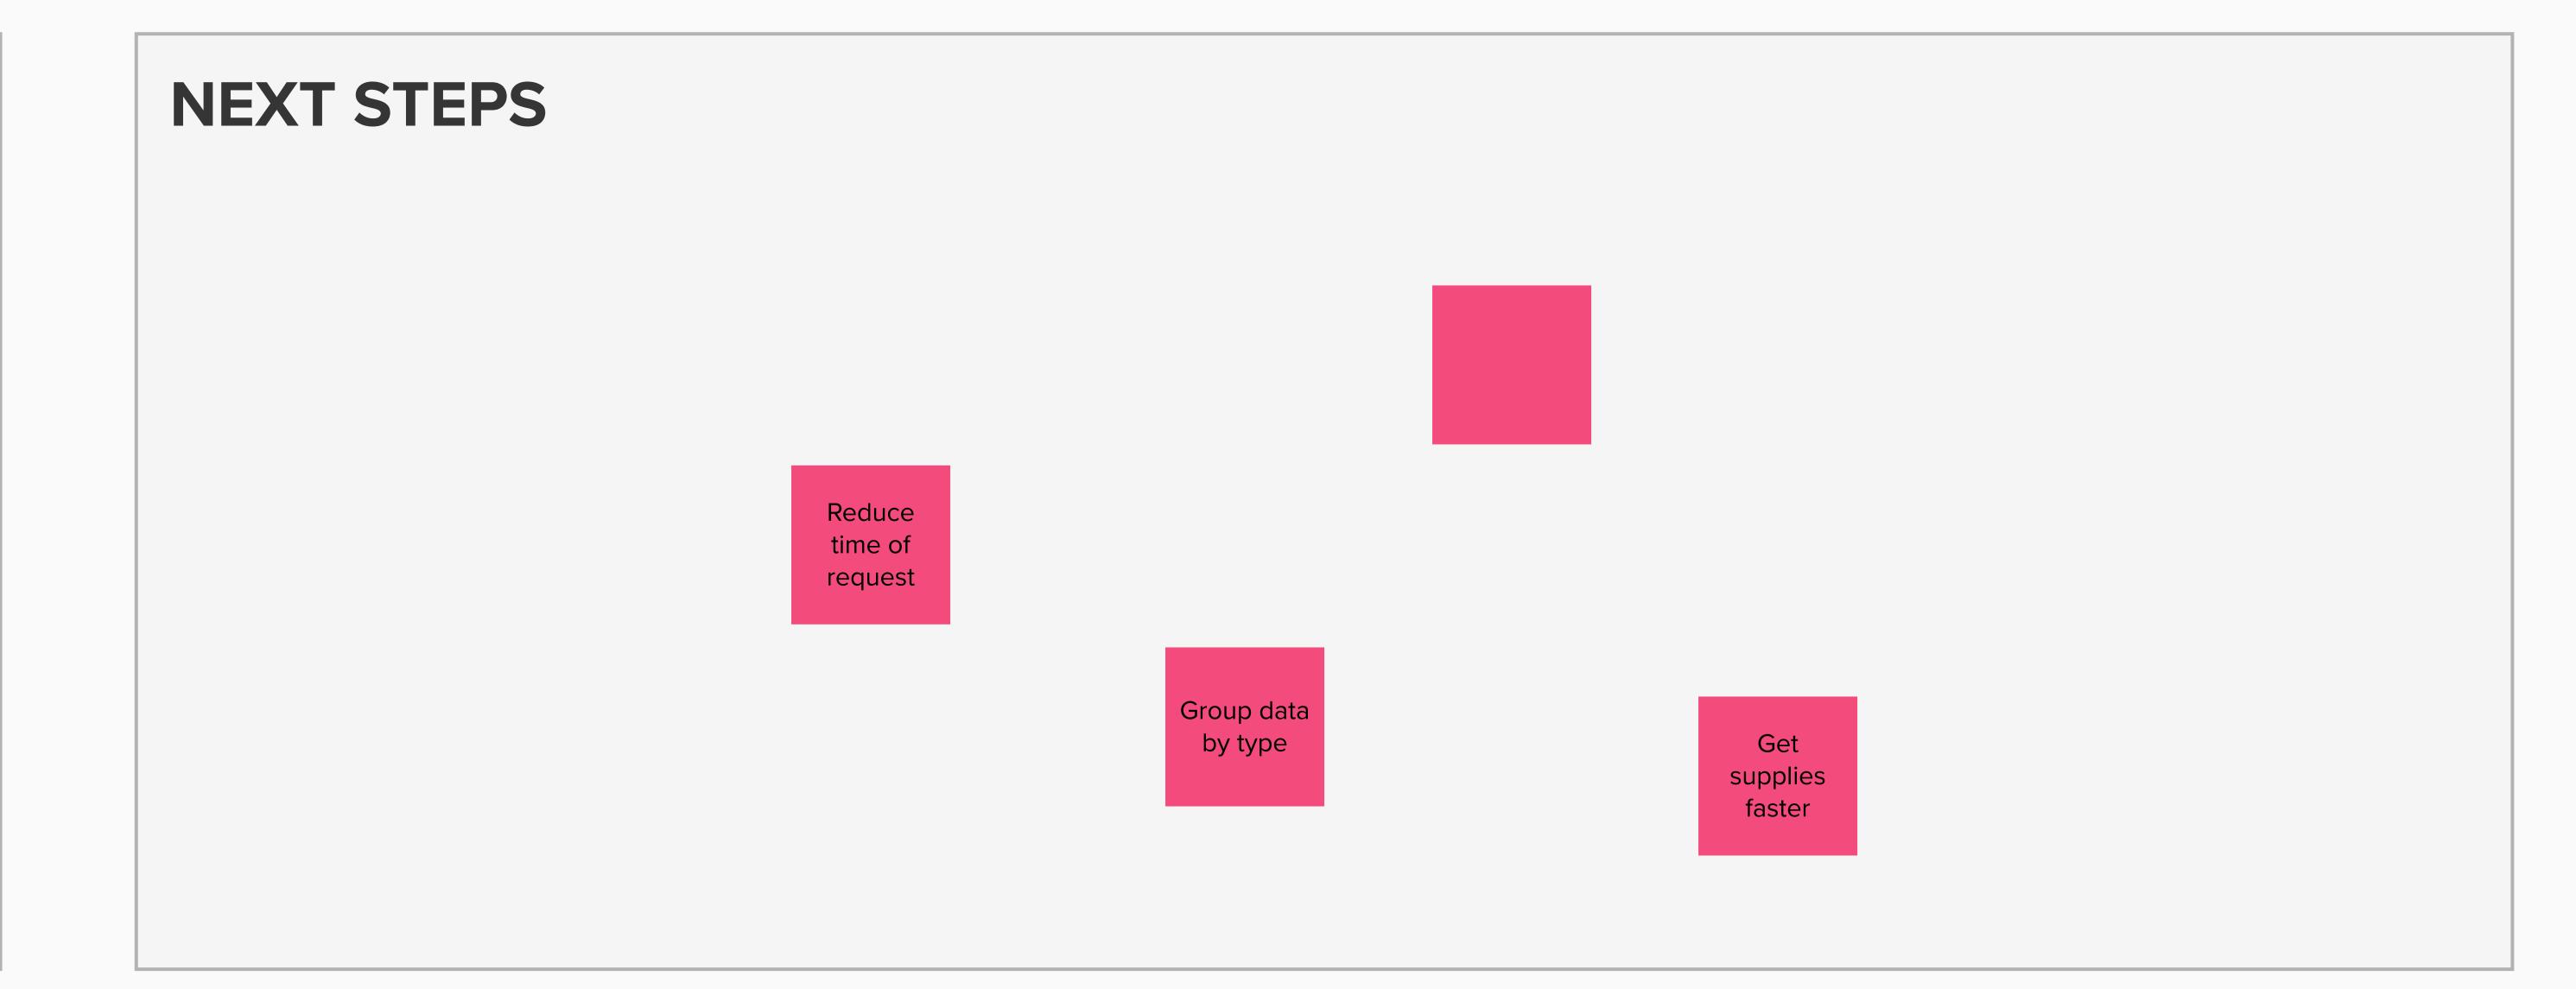

2 Develop the data flow by using the shapes and connectors in the key

Adjust and fine tune the data flow

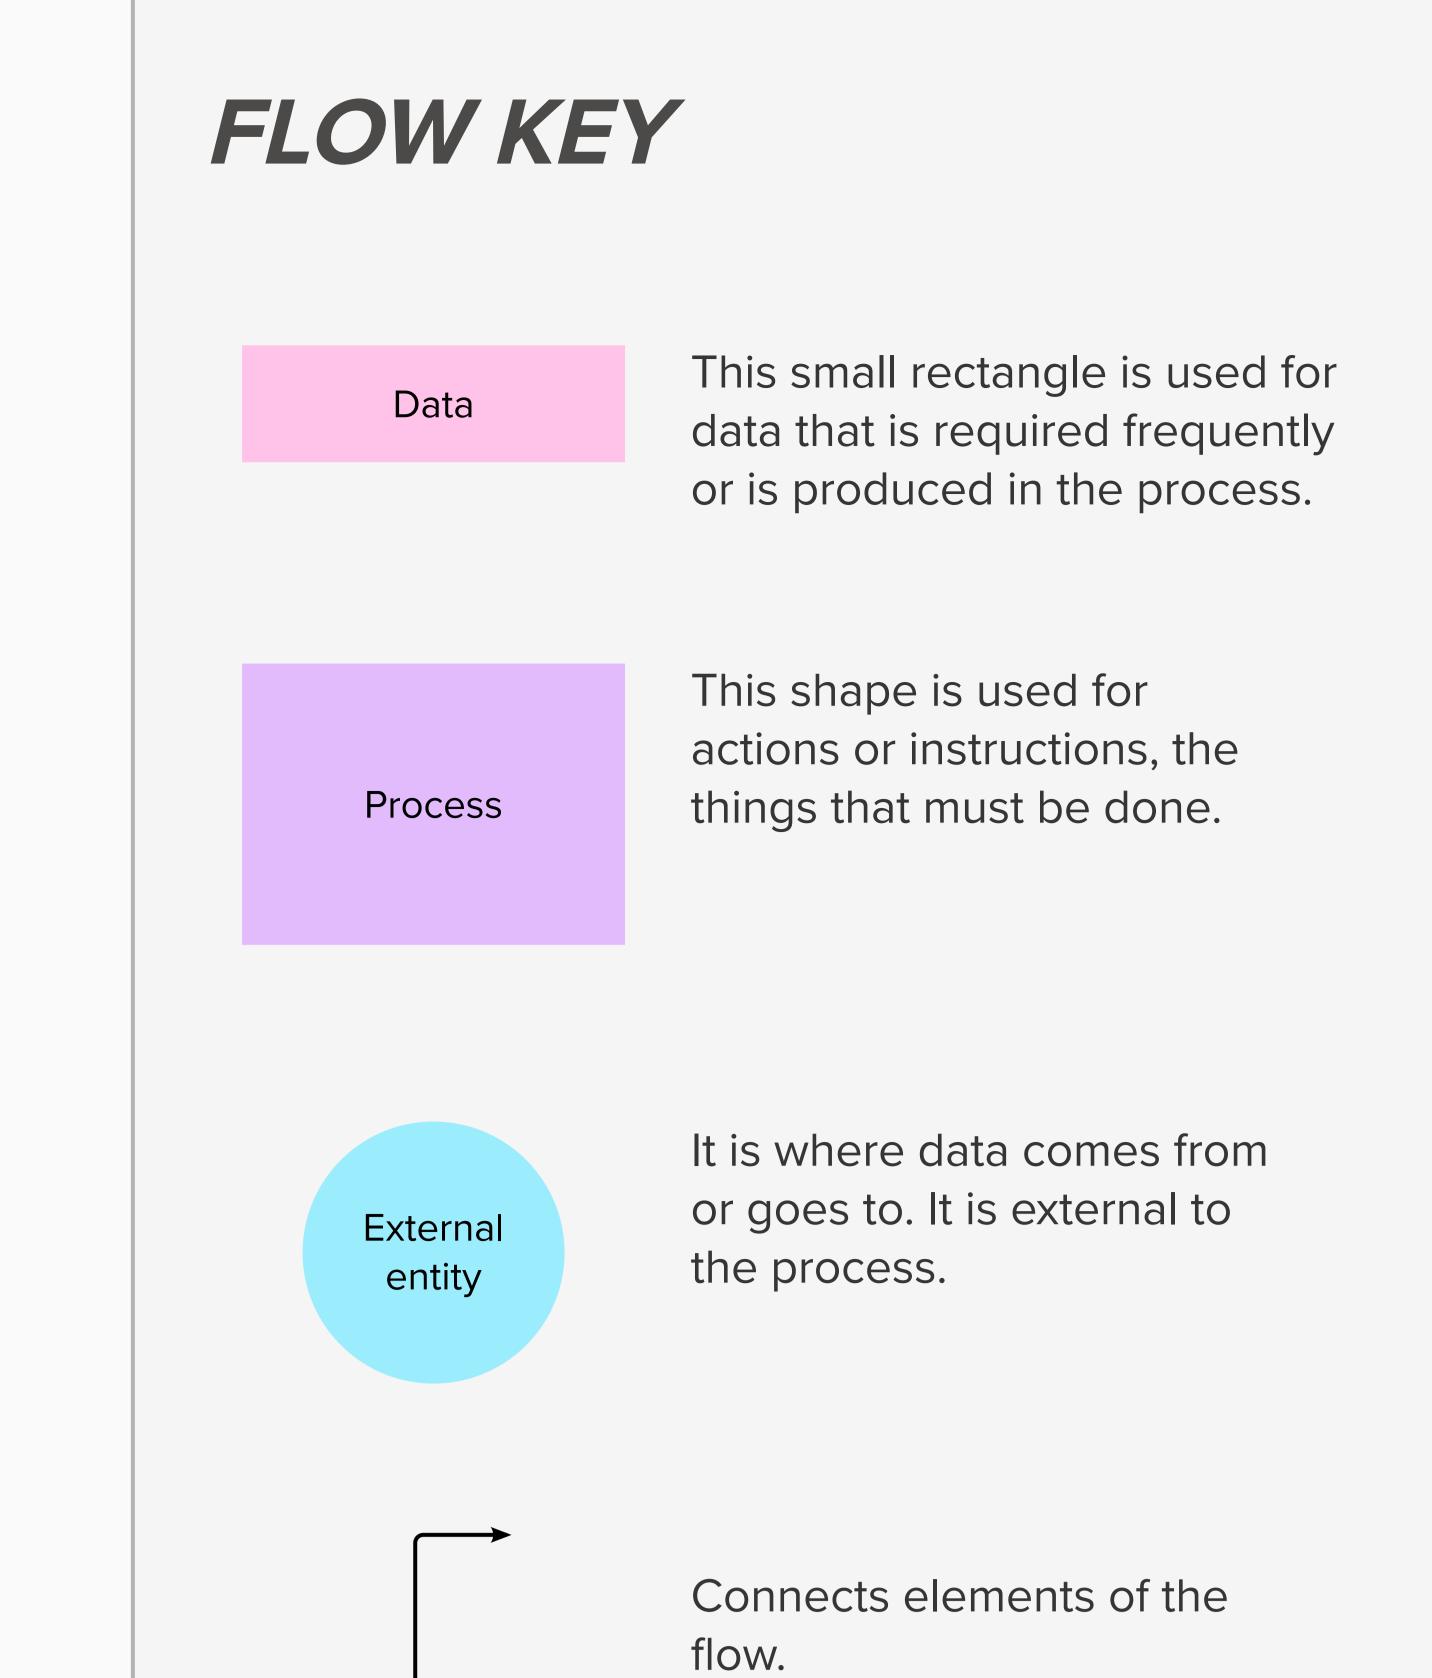

Review the data flow
